

VAULTX: Rise of the Financial Hunter

VaultX is a Core Python-based **text RPG + financial simulation game** where the player starts as a weak beginner and grows into a powerful **Financial Hunter** by making smart money decisions, surviving financial challenges, and leveling up through a Solo Leveling-inspired ranking system.

Game Idea (Brief Description)

In **VaultX**, the player enters a virtual financial world where money is not just currency—it is power. You begin with limited cash and gradually build wealth through jobs, investments, banking decisions, and risky financial choices.

Instead of a normal banking system, VaultX transforms finance into a **game-like adventure**, where every action increases your **Wealth Points (XP)** and improves your rank.

Core Concept

- You are a **Financial Hunter**
 - You progress through ranks like:
E-Rank → D-Rank → C-Rank → B-Rank → A-Rank → S-Rank
 - Each rank represents your financial strength and decision-making ability
-

Gameplay Features

-  Work jobs to earn money
 -  Use banking system (deposit/withdraw/loan)
 -  Invest money with risk and reward
 -  Face random “Financial Dungeon Events” (market crash, jackpot, debt trap, etc.)
 -  Gain Wealth Points to level up
 -  Unlock higher ranks and become financially powerful
-

Objective

The goal is to:

Start from nothing and rise to become an **S-Rank Financial Hunter**, mastering wealth, strategy, and survival in a risky financial world.

Unique Selling Point

VaultX stands out because it combines:

-  Core Python programming
 -  RPG-style gameplay
 -  Real-world financial concepts
 -  Solo Leveling-inspired ranking system
 -  Decision-based strategy mechanics
-

If you want next step, I can help you:

-  Build full code structure for VaultX
-  Create project report (abstract, objectives, modules)
-  Design game menu UI
-  Prepare viva questions & answers
